7. Music Building after hours, maybe a janitor from afar
8. None
9. Many
10. A Bunch

Performance Notes

Fill 3 samplers with quiet sounds, field recordings, cricket sounds, rain sounds, ambiance, etc. and with 2-3 performers, play sounds of each of the above sections for a duration of time proportional to a pie graph available from the results of this poll: have one performer also handle a mixer to apply larger gestures and move between sections.

Note: If you remember any other quiet evenings, feel free to mention them.
